

# BF84

## Hall Fountains

Hall Fountain's model BF84 is a complete prepackaged fountain system. BF84 is designed for quick and easy installation where extensive piping and electrical work is not possible.

Thirty years of design innovation is evident in the ease of installation, clean aesthetics and reliability built into each system. Quality workmanship and the finest materials and components are combined in a package to provide trouble-free service.

Hall Fountains model BF84 can be an attractive addition to any existing building or included in the design of a new project. However you plan to use the BF84 you can count on the quality, performance and value of the Hall name.
