

SPECIFICATIONS:

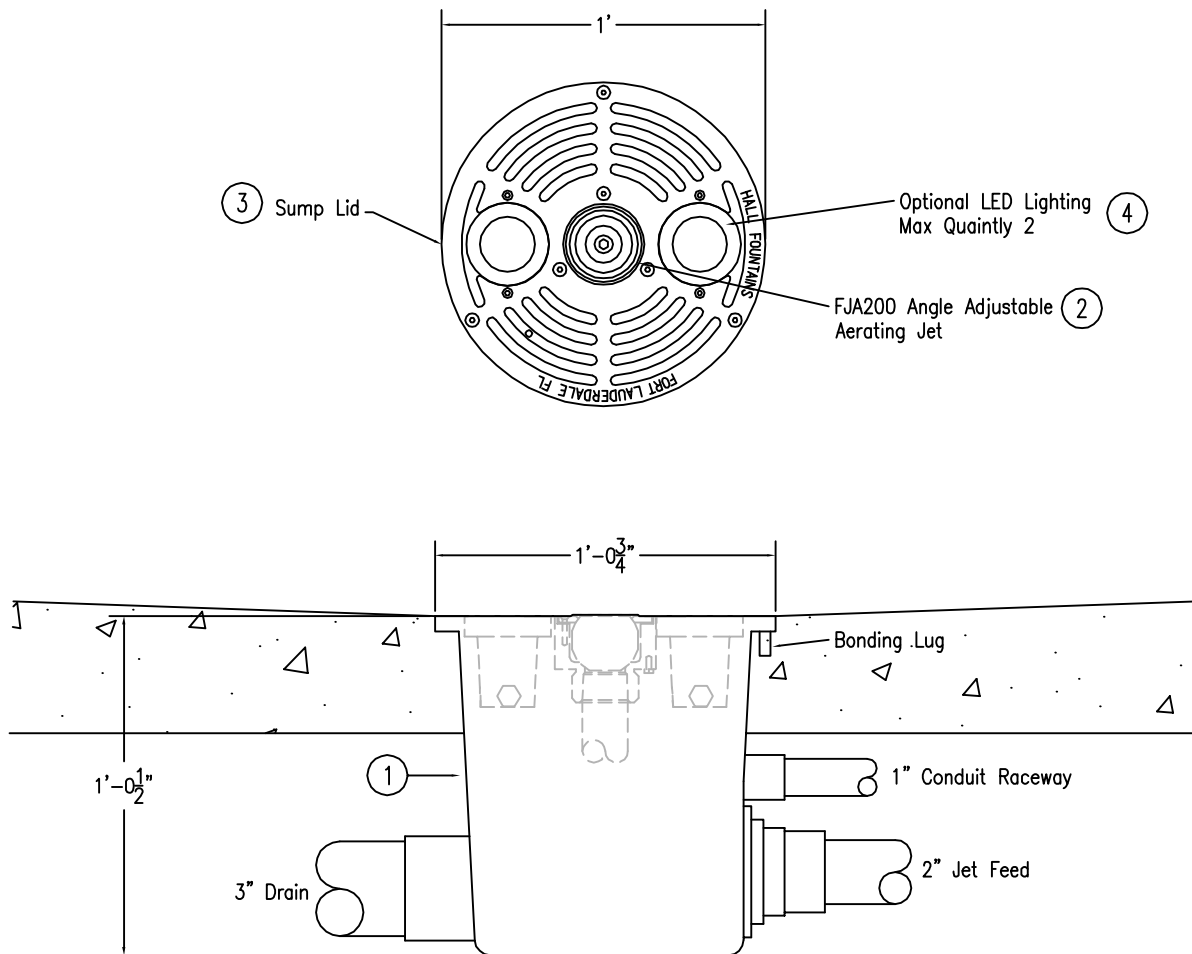

FJA200S-LED FLUSH AERATING JET WITH SUMP – features precision construction from bronze bar stock with stainless steel fasteners. The FJA200 is a water independent aerating jet, designed to be installed flush with a finished surface. The FJA200 features an attractive & durable bronze face ring allowing the precise vertical alignment crucial to the function and aesthetics of the aerated water column. Jet is installed in a fiberglass drainage sump with integral drain and water supply connections. The sump comes complete with bronze walkable lid which is available with optional led light fixtures.
